

Are you buying **body-worn cameras** that **are old** before you turn them on?

Our body-worn cameras operate on Android smartphones
...not proprietary cameras.

- ✓ Live streaming audio and video connectivity to command and control and LE Leadership (see and hear emergencies as they happen)
- ✓ Automatic and manual ON/OFF based on your department's policies
- ✓ Automatic alerts/triggering based on running, heart rate increase, shots fired and officer down
- ✓ Open platform operating on Android smartphones
- ✓ No manual downloading of files required saving officer time
- ✓ Automated video upload preserving chain of custody with full auditing
- ✓ Toughest ruggedized smartphone available
- ✓ Long-lasting battery
- ✓ Charge in the car... no nighttime charging cradle needed
- ✓ Comfortable uniform wearing options
- ✓ Full evidence management platform integrated with dispatch 911 and all content types including audio, video, NG9-1-1 and documents
- ✓ Video storage at your facility or on our cloud service
- ✓ Reduced storage fees and contracts
- ✓ FirstNet ready
- ✓ Command and control can turn on cameras if there is a disaster or LE policy allows
- ✓ Ability to capture evidence and paperwork in real-time
- ✓ Improved citizen transparency
- ✓ No first responder is left alone
- ✓ Built-in officer down location system
- ✓ Leverage the power of Android and our No Sunset policy
- ✓ Leverage our predictive analytics for easy search, retrieval and redaction
- ✓ Works locally, regionally, and nationally
