

Equature.AI

Revolutionize Public Safety, Security & Surveillance

Equature.AI Core Specifications:

- Cloud based GPU processing for fast recognition
- Edge device based processing for existing security camera systems
- Deep Neural Networks for training new object types
- Training model architecture for new object types
- Plug-in architecture for additional detection and alerting types

Equature.AI Core Benefits

- Leverage video and save 800% for FOIA requests and redaction
- Detect long guns (weapons) early, receive alerts BEFORE an incident occurs
- Identify people of interest across multiple videos
- Live facial blurring for privacy

24/7 Support: 888.305.3428
www.equature.com

Equature.AI Core Features

- Automated Facial blurring redaction
- Automated head detection in live and recorded video
- Automated weapons detection in live and recorded video
- Live redaction - blur faces in real time
- Automated text extraction for license plate processing
- Re-Identification – consistent recognition of same person across multiple frames and videos
